Dear <Insert Name>

Happy Holidays!

You may have a number of requests for charitable contributions at this time of year, and this is the season to give back! I hope you will consider putting a charity called Cure HHT on your holiday gift list.

HHT, or Hereditary Hemorrhagic Telangiectasia, is a hereditary disease that causes malformation of blood vessels. It can result in life threatening health problems, including anemia, stroke and heart failure, and affects 1 in 5,000 people worldwide. If one parent has HHT, there is a 50% chance that each of his or her children will inherit the disease.

<<insert your personal connection to HHT and Cure HHT here!>>

Cure HHT is the only 501(c)(3) nonprofit organization in the world dedicated to supporting patients, families and physicians who are affected by HHT. Cure HHT funds research, educates physicians and families, and supports a network of 25 HHT Centers of Excellence at noted medical centers around the country. The organization also provides seed grants that support scientists, both the young and the experienced, in their research on HHT.

This charity does so much for the HHT community, and I want to do my part to raise awareness about this important cause. If you are able, I hope you will join me in contributing a gift of hope, health and happiness for families with HHT.

Thank you and may you have a joyous holiday season, and a happy, healthy New Year.
