Hereditary Hemorrhagic Telangiectasia

HHT is a genetic disease that causes malformed blood vessels, leading to sudden and extreme bleeding throughout the body. The most obvious symptoms are chronic nosebleeds and red spotting on the skin.

If any of these signs sound familiar, contact Cure HHT at www.curehht.org, hhtinfo@curehht.org or 410-357-9932. Cure HHT is the only nonprofit in America dedicated to finding a cure for HHT and creating a community of support for patients.
