

Marianne S. Clancy, MPA

Chief Executive Officer and Senior Director, Strategic Partnerships, Cure HHT

Ms. Clancy has been CEO of Cure HHT for 24 years. Under her leadership, she initiated the Cure HHT research grant funding program to established and young researchers. Under her tenure, through the investment of \$3 Min seed grants since 2004, HHT research funding has been leveraged nearly \$60M in private and public investment. She has been instrumental in providing the patient voice to the design of HHT clinical research trials.

Marianne has expanded access to expert HHT care through the establishment and management of 33 HHT Centers of Excellence in North America and 25 centers globally. Her work in obtaining release of the HHT gene patents led to the launch of genetic testing for HHT in North America. Her team has led collaborations to enable the robust growth of the International Scientific Conferences in HHT since 2001 as the sole sponsor of these convenings. She is the principal investigator in the patient led international HHT research network funded by the Chan Zuckerberg Rare as One grant. Through Cure HHT, she has led funding initiatives for 2 International HHT Guidelines conferences resulting in standardized HHT diagnostic and treatment guidelines for health care professionals. Marianne has led the HHT legislative initiatives and secured federal funding for HHT Centers of Excellence in the U.S., launched the first Comprehensive Natural History Registry Natural History Study and a Continuing Medical Education program. and has been a global educator and advocate on HHT issues to government agencies, physician, patient and biotech pharmaceutical partners.

In 2022, Marianne created a Therapeutic arm at Cure HHT to accelerate research translation, clinical trials and new therapeutic development and treatment for the global patient community.

Prior to employment with Cure HHT, Marianne founded a health care consulting company specializing in trans-dermal/oral drug delivery and oral health care. Marianne's work experience included national health care management with Oral-B Laboratories, a Gillette Company, for 14 years. She was responsible for development and implementation of North American university sales and marketing programs, management of clinical research trials, new product evaluation and development of corporate training worldwide. Marianne has conducted lectures to health care professionals throughout North America and has published numerous articles and was a contributor to several textbooks. She also held faculty positions at Forsyth Dental Center, Boston University and Tufts University School of Dental Medicine.
