

YOU'RE INVITED:

HHT Friday Satellite Symposia

Advances in Targeting Angiogenesis and Managing Severe Anemia in Vascular Bleeding Disorders: Hereditary Hemorrhagic Telangiectasia and Beyond

Hematologists are on the front line of change as new therapies emerge for long-overlooked vascular bleeding disorders like HHT. This inaugural ASH symposium brings together international experts to share more on breakthroughs, strategies, and therapies reshaping patient care.

Why Attend?

- Discover the latest antiangiogenic therapies impacting patient outcomes
- Learn practical strategies for managing chronic, severe iron deficiency anemia
- Hear directly from international leaders in HHT care
- Connect with peers advancing the future of vascular bleeding disorder management
