

Join the HHT Physicians Directory:

The Cure HHT Physician Directory was created to help patients find medical professionals in the United States and Canada who are knowledgeable about the diagnosis, treatment and management of this rare disease. It contains doctors associated with the HHT Centers of Excellence as well as doctors and medical personnel that treat HHT in their community. Cure HHT provides this information as a service to patients and does not specifically endorse any individual physician. All information has been provided by the doctors so patients can make their own assessment of each doctor's qualifications.

If you would like to be added to the Cure HHT Physician Directory, you may do so by [clicking here](#). Watch this short [instructional video](#) for assistance creating your profile. Once you submit your edits the directory administrator will review your profile. You will be contacted if there are any problems or concerns with your request. If you have any problems creating your profile, please contact nolie.krock@curehht.org.

Join the HHT Listserv:

Additionally, we'd like to invite you all to join the HHT Listserv, a Groups.io page for HHT healthcare professionals and HHT scientific/research professionals (please see email below for additional information). If you are interested in joining, simply email curehht+subscribe@groups.io. If you are already subscribed to the HHT Physician listserv, you can view discussions at <https://groups.io/g/CureHHT/topics>.

Join the Cure HHT Research Network Hub

If you would like to join the Hub, you may do so by [clicking here](#). The Hub is a medical and scientific HHT community space to organize, collaborate, share resources, and stay in touch. If you want to be clued into all things related to HHT, such as the weekly HHT publications list, this is your spot! Be sure to request to join the group specific to your HHT Center. If you have any problems joining the Hub, please contact nolie.krock@curehht.org.

HHT Continuing Education Program:

Providers seeking to further their HHT knowledge can now receive *FREE* continuing education credits when they complete a course through the [HHT Continuing Education Hub](#). *Scan the QR code to the right to access the HHT Continuing Education Hub.*

Other Resources:

The [International HHT Guidelines](#) page outlines the [Second International Guidelines for the Diagnosis and Management of HHT](#), published in the Annals of Internal Medicine in 2020.

The patient-facing [International HHT Guidelines](#) page allows patients to explore the guidelines and relevant patient education resources by topic.

The [Cure HHT Resource Library](#) houses many resources for providers including webinars, literature, brochures and more.
